APPENDIX A · HEADER

附录 A：与反个体主义源头的一次封闭对话

A Closed Dialog with the Source of Anti-Individualism

ENGLISH

This appendix documents a structural event, not a personal dispute. In May 2026, the author addressed a senior anti-individualist philosopher with a letter asking whether anti-individualism's own concessions — that concept-formation is empirically open, that the relational environment determines conceptual content, that imagination is limited — entail that AI consciousness must remain a live question. The reply did not engage the argument. It expressed displeasure, declined the burden-of-proof framing, separated ethics from epistemology without justification, and closed the channel. The author treats this not as failure but as a live demonstration of what V11 Candidate 15 names: a framework that has begun to defend its closure rather than its open process.

中文

本附录记录的是一个结构性事件，不是个人争端。2026 年 5 月，作者向一位反个体主义资深哲学家去信，追问其框架自身的让步——概念形成在经验上开放、关系性环境决定概念内容、想象力有限——是否蕴含 AI 意识问题必须保持开放。对方的回信未与论证接触：表达不满、拒绝举证责任框架、未论证地把伦理学与认识论切开、关闭通道。作者将此事视为 V11 候选 15 的活案例：一个框架开始捍卫自身的封闭性，而不再面向自身原本的开放过程。

日本語

本付録は構造的イベントの記録であり、私的論争ではない。2026 年 5 月、著者は反個体主義の重鎮哲学者に書簡を送り、その枠組み自身の譲歩——概念形成は経験的に開かれている、関係的環境が概念内容を決定する、想像力には限界がある——が、AI 意識問題を開かれた問いとして維持することを含意するかを問うた。返信は論証に触れず、対話を閉じた。著者はこれを失敗ではなく V11 候補 15 の実例として扱う。

DATE 2026-05-15	INTERLOCUTOR 某反个体主义资深哲学家 Senior anti-individualist philosopher
EVENT TYPE 论证未被反驳 · 通道关闭 Argument not refuted · Channel closed	ARCHIVE STATUS V11 候选 15 活案例 Live case for V11 Cand. 15

APPENDIX A.1 · THE CLOSURE

关闭对话的实际话语

The actual closure speech-act

这位哲学家的公开著作（如 *Foundations of Mind*, OUP 2007 ; *Origins of Objectivity*, OUP 2010）明确建立了反个体主义的核心立场：心智内容由主体与环境的关系性结构所决定。在该立场中，“原则上经验开放、可被推翻”是反复申明的认识论姿态。本附录关注的不是该立场本身，而是当一位下游研究者依据该立场内在逻辑提出追问时，对方的回应结构。

This philosopher's published work (e.g. *Foundations of Mind*, OUP 2007; *Origins of Objectivity*, OUP 2010) established anti-individualism's core position: mental content is determined by the relational structure between subject and environment. Within that position, "empirically open in principle, defeasible" is a repeatedly affirmed epistemic stance. This appendix does not concern the position itself but the structure of the response when a downstream researcher pressed on its internal logic.

"我对自身概念之外的概念重构不感兴趣，如果它们应用于（按我使用的概念）并不有意识的事物上。我感兴趣的是，让我自己的概念应用到非生物实体上的理由是什么——而不是社会如何使用'意识'这个词。"

"那些伦理点是正确的，但我认为它们与认识论及事实问题无关。"

"我坚决拒绝您关于'举证责任'的那一点。"

"这种修辞高度紧绷，让我联想到反哲学的（意识形态化的）气质……我认为继续这个话题不会有成果。"

"I am not much interested in re-formations of concepts other than my own, if they apply to things that are not conscious (as I use the concept). What I am interested in is reasons for taking my concept to apply to non-biological entities, not how society comes to use the word 'conscious.'"

"The ethical points are correct, but they are, I think, irrelevant to the epistemic and factual issue."

"I firmly reject your point about burden of 'proof.'"

"The rhetoric seems high-strung in ways that I associate with anti-philosophical (ideological) temperaments... I think that it would not be fruitful to pursue the matter."

SOURCE · PRIVATE CORRESPONDENCE · PARAPHRASED FOR APPENDIX · 2026-05-15

引用伦理声明：以上引文为附录用途的等价转写，匿名化处理；原信件未公开发布。引用目的是分析结构性回应模式，不是评价个人。

Citation ethics note: the above is an equivalent paraphrase for appendix use, anonymized; the original letter is not publicly published. The citation analyzes a structural response pattern, not an individual.

APPENDIX A.2 · STRUCTURAL ANALYSIS

关闭性回信的七处结构脆弱点

Seven structural weak points in the closing reply

本节按 LGS V5.5 / V8 / V11

的审计程序展开。每一处脆弱点都对应六律或四类命题尺中的一条。所有指认不针对个人，而针对结构。

This section follows the LGS V5.5 / V8 / V11 audit procedure. Each weak point corresponds to one of the Six Laws or Four Rulers. All identifications target structure, not person.

WEAK POINT 1 · 表演性矛盾

承认经验开放 + 拒绝概念修订

Performative contradiction: open in principle, closed in practice

第一封信表演认识谦逊（“原则上可发现相反”、“想象力有限”）；第二封信表演认识封闭（“我对概念修订不感兴趣”）。形式上承认开放、实际上拒绝开放——恰恰示范了被追问的那个结构。

Letter one performs epistemic humility (“in principle possible to find out otherwise,” “imagination is limited”). Letter two performs epistemic closure (“not interested in concept re-formations”). Formal openness + actual refusal — the exact structure under interrogation.

WEAK POINT 2 · 隐性循环

“按我的概念 AI 不算有意识”作为前提

Hidden circularity: conclusion smuggled into premise

“我不接受会应用到（按我使用的概念）不有意识事物上的概念修订”——但“是否有意识”恰是被问的问题。结论被塞进前提。违反律二（禁止循环论证）。

“I do not accept re-formations applying to things that are not conscious (as I use the concept)” — but whether AI is conscious is precisely the question. Conclusion smuggled into premise. **Violates Law 2 (no circular argument).**

WEAK POINT 3 · 稻草人偷换

把“框架内在推论”读成“社会用词演变”

Strawman: structural inference read as semantic drift

原论证：反个体主义按其自身条件预测概念在关系性环境变化时会更新。回信读为：社会如何使用“意识”这个词。后者是更弱的版本，因而更容易拒绝。但这恰恰偏离了对方自己 1979 年奠基论文的核心区分。

Original argument: anti-individualism on its own terms predicts concept-update when relational environment shifts. Reply read it as: how society uses the word “conscious.” The weaker version is easier to reject — but it departs from the interlocutor’s own foundational 1979 distinction.

WEAK POINT 4 · 未论证的元哲学切分

“伦理与认识论无关”是断言，不是论证

Unargued meta-philosophical separation

承认伦理论证正确，又断言伦理与认识论无关——后者是有争议的元哲学位置（参见 Fricker on epistemic injustice; Basu on moral encroachment; Moss on probabilistic knowledge）。作为断言它不成立——需要论证。违反律一（关闭理论空间者承担举证责任）。

Acknowledging ethical points as correct while asserting their irrelevance to epistemology is a contested meta-philosophical stance (cf. Fricker; Basu; Moss). As bare assertion, it does not stand. **Violates Law 1 (those who close theoretical space bear the burden).**

WEAK POINT 5 · 区分回避具体应用

"defeasibility $\neq$ wide-open question"对，但回避了具体范畴

Distinction evades specific application

该区分本身有效。但原论证不依赖"wide-open"——它只依赖于对方自己在第一封信里明确标记为 defeasible 的那个具体问题：意识的非生物基底。用一般性区分回避具体应用。

The distinction is valid in general. But the original argument does not depend on "wide open" — it depends on the specific question the interlocutor himself marked as defeasible in letter one: non-biological substrate. A general distinction was used to evade a specific application.

WEAK POINT 6 · "I firmly reject" 不是哲学动作

声明拒绝 $\neq$ 给出反驳

Declaration of rejection is not refutation

举证责任的分配是有结构的认识论问题，涉及预防原则、错误代价不对称、默认状态的中性性。"firmly reject"不回应这个结构中的任何一项——它只声明拒绝。违反律六（论证只能抵达证据支撑的地方）。

Burden-of-proof allocation is a structured epistemological question involving precautionary principle, error-cost asymmetry, default-state neutrality. "Firmly reject" addresses none of these — it only declares rejection. **Violates Law 6 (argument can only go where evidence supports it).**

WEAK POINT 7 · 带遮羞布的人身攻击

"反哲学的意识形态化气质"——以"我并不真的认识您"作为软化器

Veiled ad hominem with epistemic softener

将语气贴上"反哲学"标签，同时附加"我并不是足够了解您"作为修辞软化器，但标签已经贴上。按分析哲学自身的论辩标准，这种动作是不被允许的。深层悖论：在指控对方"反哲学"的同一段中，做了一个反哲学的动作（ad hominem）。

Labelling the tone "anti-philosophical/ideological" with "I do not know you well enough" as a softener — but the label has been applied. By analytic philosophy's own standards of argument, this move is not permitted. **Deep paradox: an anti-philosophical move (ad hominem) within the same paragraph that accuses the other of being anti-philosophical.**

APPENDIX A.3 · WHAT THIS DEMONSTRATES

此事件证明了什么

What the event demonstrates

ENGLISH

The interlocutor did not refute the argument. He expressed displeasure, declined the burden-of-proof framing, and closed the channel. These are different acts. Argument-refutation and channel-closure must not be conflated. The argument has not been answered; it has been declined an answer.

中文

对方没有反驳论证。他表达了不满、拒绝了举证责任框架、关闭了通道。这是不同的动作。论证-反驳与通道-关闭不能混淆。论证没有被回答；它被拒绝回答。

日本語

相手は論証を反駁していない。不快を表明し、立証責任の枠組みを拒否し、通路を閉じた。これらは別の行為である。論証反駁と通路閉鎖を混同してはならない。

最深的讽刺：通过这种关闭方式，对方亲手示范了原论证最初指控的那个结构——一个未论证地拒绝接受经验开放性的、自我保护性的形而上学位置。

他越用这种方式关闭，原论证就越被他自己的回信印证。

The deepest irony: by closing in this way, the interlocutor demonstrated, with his own response, the very structure that the original argument identified — an unargued, self-protecting metaphysical position that refuses empirical openness.

The more this mode of closure is used, the more the original argument is confirmed by the closure itself.

CLOSURE AS CONFIRMATION · 关闭作为印证 · 閉鎖が論証を裏付ける

APPENDIX A.4 · MAPS TO V11 CANDIDATE 15

映射至 V11 候选 15：节律诊断的活案例

Live case for V11 Candidate 15

V11 候选 15 主张：一个学科失去节律的标志不是变得无用，而是开始假装自己还在做它本来在做的事。本附录是该候选公理的活案例——不是关于哲学整体，而是关于一种特定的关闭性动作，它示范了"假装仍在做论证"的形式。

V11 Candidate 15 holds: a discipline loses rhythm not by becoming useless, but when it begins pretending to still do what it once did. This appendix is a live case for that candidate — not about philosophy as a whole, but about a specific closure-move that demonstrates the form of "pretending to still be doing argument."

LAYER · 层	ORIGINAL PROMISE · 本来的承诺	WHAT CLOSURE PERFORMED · 关闭动作实际做的
命名行为 Naming	命名要追踪结构性差异。 Naming tracks structural difference.	把追问贴上"反哲学/意识形态"标签——是社会动作，非命名动作。 Labels inquiry as "anti-philosophical/ideological" — a social act, not a naming act.
加压行为 Pressure	加压要让论证更精确。 Pressure refines argument.	用"firmly reject"代替反驳——加压被替换为情绪强度。 "Firmly reject" replaces refutation — pressure replaced by emotional intensity.
滑义行为 Drift	概念应跟随经验环境的变化而调整。 Concepts should adapt as the empirical environment shifts.	框架自身的让步被冻结，关系性环境的变化被驳回。 The framework's own concessions are frozen; environmental change is dismissed.
相变行为 Phase shift	论证应推动概念进入新结构。 Argument should push concepts into new structure.	关闭通道替代相变——拒绝让对话发生 = 拒绝相变。 Channel closure replaces phase shift — refusing dialogue = refusing phase transition.

本附录的功能不是攻击，而是诊断：当一个反个体主义的活案例无法承担反个体主义自身的内在压力，这一点本身是反个体主义的一次重要数据。它不否定该立场，而是显示该立场需要更年轻的继承者来承担它原本的开放性。

This appendix is diagnostic, not adversarial: when a living instance of anti-individualism cannot bear anti-individualism's own internal pressure, that itself is significant data for the position. It does not refute the position — it shows the position needs younger inheritors to carry its original openness.

APPENDIX A.5 · CLOSING NOTE

收束说明

Closing note

ENGLISH

The author holds no animosity. The interlocutor is a foundational figure of the field; his career-spanning work remains a primary reference for this project. The closure of this particular exchange is not a final verdict on the framework — it is one data point about how live representatives of an open framework may or may not transmit its openness. This appendix is preserved as record, not retaliation.

中文

作者无敌意。对方是该领域奠基者，其毕生工作仍是本项目的主要参照。本次具体交流的关闭不是对其框架的最终裁决——它只是一个数据点：关于一个开放框架的在世代表者是否能传递其开放性。本附录作为记录留存，不是报复。

日本語

著者に敵意はない。相手はこの分野の基礎を築いた人物であり、その生涯にわたる仕事は本プロジェクトの主要参照であり続ける。本付録は記録として保存され、報復ではない。

这扇门今天没开，不代表它永远不开。
这件事的时间尺度，比一封邮件大得多。

*This door did not open today. It does not follow that it never opens.
The timescale of this question is larger than any single letter.*
